ABOUT WIMCO

WIMCO Medical Group is Private Company Established in 2011, WIMCO Medical has become one of the most pioneering ophthalmic medical equipment companies' distribution premium brands, we shall continue to forge ahead, God willing, and keep looking for new opportunities to grow and expand our business with an aim to provide high-quality products in Ophthalmology Surgical & Diagnostic. Providing the maximum excellence and support to our customers with highly professional team and after-sales service

Our vision is to align with the dynamic advancements within the Ophthalmology sector and to continuously adapt to the evolving demands of a growing market. We aim to elevate healthcare standards across all Ophthalmology field, aspiring to achieve international benchmarks in the field. Our goal is to become the preferred and trusted supplier for our key customers by delivering superior products and exceptional services

**WE MAKE EYE SURGERY EASIER,
SAFER AND MORE EFFICIENT**

No matter whether it is cataract surgery, glaucoma surgery or vitrectomy surgery: all our surgical devices, instruments and consumables have been designed with the highest degree of consistency to meet the needs of both surgeons and OR personnel.

CataRhex 3[®]
MAKING THE DIFFERENCE
WITH THE NEW
PHACO POWER

The CataRhex 3 surgical platform from Oertli proves that great things sometimes come in small packages. With unbeatably compact dimensions and a lightweight at just five kilograms, the CataRhex 3 is systematically focused on mobility and portability – without compromising on performance. With the new SPEEP pump and the familiar easyPhaco technology, we have developed an effective tool for simple, safe and efficient work in routine surgery.

oertli®

SWITZERLAND

During surgery, there is no time to work through complex menu structures and clumsy user processes. This is why the Faros surgical platform is systematically designed for user friendliness

The compact Faros is optionally available as a device for the anterior segment or as a combined system for both the anterior and posterior segments

Faros™

MAKING THE DIFFERENCE
WITH THE NEW POWER LED

There is no room for compromises or half-hearted things in areas where quality and precision are decisive. Surgical interventions in the eye require the surgeon's full attention and competence. The surgeon, in return, needs to rely on the best possible technology and most reliable systems. Only in this way can the transition from a good to a perfect surgical result be made. Oertli makes the difference – with the OS4, the top-class surgical platform for vitrectomy surgery, glaucoma surgery and cataract surgery.

OS4™

MAKING THE DIFFERENCE
WITH EVEN MORE VERSATILITY

YOUR VISION. OUR FOCUS.

Our vision is to empower providers with smart, value-driven and efficient technologies for enhanced care. Keeping pace with the ever-changing landscape of the healthcare industry, Topcon Healthcare offers the latest integrated solutions including advanced multimodal imaging, vendor-neutral data management and groundbreaking remote diagnostic technology.

YOUR VISION. OUR FOCUS.

Maestro2

Introducing automated OCT, true color fundus photography and automated OCT Angiography in one compact instrument. With the touch of a button, OCTA provides you instantaneous vascular structure information – from our world-renowned, multi-modal OCT solution.

Key features

- OCT and true color* fundus photography
- Fully automated image capture
- 3D wide scan with Hood Report for Glaucoma
- Panoramic fundus imaging

YOUR VISION. OUR FOCUS.

Nw500

Introducing Topcon's next-generation fundus imaging camera that offers bright and sharp images in well-lit conditions, even for eyes with small pupils.

Key features

- Sharp, high-quality images
- Small pupils, 2mm or larger*
- Easy to use
- Robotic

YOUR VISION. OUR FOCUS.

KR-800

The KR-800 & RM-800 auto kerato- and refractometers incorporate the very latest in design technology and ergonomics.

Key features

- Topcon's Rotary Prism Technology™ for unparalleled accuracy
- 8.5 inch LCD touchscreen panel
- Connectable LAN

Perimetry

OCTOPUS 900/600 Goldmann Perimetry for the future In 1945, Professor Hans Goldmann of the University of Berne, together with Haag-Streit, developed the Manual Goldmann perimeter. This instrument is still the reference for kinetic perimetry today and all of its capabilities and specifications are built into the Octopus 900. Furthermore, Haag-Streit has pioneered many significant innovations, including automated static perimetry, the G-Program and the direct projection system, as well as fast strategies and outstanding software for visual field analysis.

OCTOPUS 900
Flexibility and reliability

OCTOPUS 600
Perimetry simplified

MICROSCOPE SYSTEM

METIS 900

Your surgical control center The Haag-Streit METIS ophthalmic microscope system combines over a century of optical excellence with efficient workflow and proper ergonomics. It takes a great team to deliver the best surgical outcomes, all supported by a durable and dependable microscope. Put your trust in METIS: designed to give you unparalleled control over your procedures, your health, and your investment – all from one central point.

Optics + design = superior optical experience Haag-Streit has manufactured quality optics for over a century. Consequently, our vast experience and know-how mean that we're perfectly positioned to understand your requirements and deliver a tailored solution to meet your individual needs. Using the latest technology and production processes, Haag-Streit controls the design, manufacture, and servicing of every element of the METIS.

Ultrasound A/B scan COMPACT Touch

The COMPACT TOUCH® ultrasound platform features the A/B modes, as well as the pachymetry. It benefits from a new generation of 15MHz probe with a resolution increased of 30%.

Small in size, it will fit in any working environments, even the smallest examinations rooms.

·The 15MHz B probe that redefines the gold standard in B-mode imaging by bringing an outstanding image quality, for a better and quicker diagnosis.

·Ultra-compact ultrasound system that further increases the working environment of the physicians, for a better user experience.

Connected, it will easily interface its data to your DICOM, EMR, or WIFI networks.

CATARACT AND GLAUCOMA LASER PLATFORM

OPTIMIS FUSION™ laser

is a versatile laser platform combining YAG photodisruption treatments and advanced SLT photoregeneration therapy in one fully integrated system.

Upgradable, it can easily be transformed into a trio, anterior and posterior laser treatment platform by combining it with a compatible Quante® Medical retina laser.

Key Features

- Premium optics for viewing both the anterior and posterior segments.
- Quante® Medical proprietary technology: dual-mode YAG/SLT laser cavity.

RETINAL PHOTOCOAGULATION, **VITRA 2[®] laser**

Ergonomic and easy to use, VITRA 2[®] laser offers a wide array of parameters tailored to the treatment of retinal pathologies.

Adaptable on Haag Streit or Zeiss sit lamps, it features a unique clinically oriented user interface, and software-guided treatment, enhancing retinal treatments.

Key Features

- Traditional 532nm green wavelength.
- SingleSpot mode for conventional thermal retina treatments.
- Multispot Pattern Scanning mode for peripheral treatments better tolerated by patients.

**GLAUCOMA LASER
NEW LASER THERAPY
FOR ADVANCED AND END-STAGE GLAUCOMA**

VITRA 810 laser

Ergonomic and easy to use, Vitra 810™ is versatile infrared laser featuring single spot and subliminal technologies which can be used for multiple treatment purposes.

When used for glaucoma treatments, Vitra 810™ offers a new subthreshold cyclophotocoagulation treatment procedure named SubCyclo®, a very promising laser therapy for advanced and end-stage glaucoma patients.
